American Welding Society®
OKLAHOMA CITY SECTION

Oklahoma City Section
Invites You to the November Technical Section Meeting

When: November 12th 2026, Dinner @ 6pm, Meeting @ 7pm

Where: Metro Tech South Bryant Campus, 4901 S Bryant Ave OKC, OK 73129

Cost: AWS members - $10, AWS student members - Free

Meet in the Auditorium in the Automotive Center (see attached map)

Topic:

Stainless Steel Passivation

Please join us for a presentation and demonstration about passivation.

Speaker Rex Reynolds is a Business Development and Technical Process Leader specializing in stainless steel weld cleaning, passivation, and operator-proof workflow development, supporting fabricators, welders, and distributors across Texas, Oklahoma, Arkansas, and Louisiana with field-validated processes that improve corrosion performance, safety, and weld quality. Rex works extensively with Cougartron systems, developing SOPs, training programs, and metallurgically accurate cleaning and passivation methods for stainless applications ranging from food-grade piping to architectural fabrication.

Cougartron is a leading manufacturer of stainless-steel weld-cleaning and passivation systems, providing safe, fast, and metallurgically accurate solutions for removing heat tint, restoring corrosion resistance, and improving weld quality. Our equipment and electrolytes support fabricators and welding teams with consistent, inspection-ready results across all stainless applications.
