MEMORANDUM FOR CLAYTON YEUTTER

FROM: SAMUEL K. SKINNER 

SUBJECT: RIO

Will you please follow up on the negotiating instructions to be followed during the Rio meeting as soon as possible. I have called Bill Reilly and told him that you are working on them and have asked him to be in contact with you.

FROM: **CLAYTON YEUTTER**
Counsellor to the President for
Domestic Policy

Sam, I talked with Zoellick about how we can best put some curbs on Reilly while he is in Rio.

Where we come out--if this sounds o.k. to you--is that we would together prepare a set of negotiating instructions for the Rio meeting. This would be done later this week or early next week, and both Zoellick and I would sign off on them.

The instructions would be fairly general, so that we would not put too much of a leash on Bill. That would be unfair to him. But they'd give him the broad parameters of what he could agree to in Rio. And we'll probably add a catch-all that would ask him to clear any "major" policy questions that might emerge with me by phone.

If you concur, please give him the word since he has a lot of preparation ahead of him. Many thanks.

MEMORANDUM FOR THE PRESIDENT

FROM: BOB MARTINEZ
DIRECTOR

A handwritten signature in dark ink, appearing to read "Bob Martinez", written over the printed name and title.

SUBJECT: Third Quarter 1991 DAWN Data

On Wednesday, May 13, 1992, HHS intends to release third quarter 1991 data from the Drug Abuse Warning Network (DAWN), showing hospital emergency room events that are drug-related.

DAWN shows the consequences of drug use, not the frequency, but it is taken to be a general indicator of hard-core drug use.

The DAWN figures have increased for three straight quarters and are now back to their level between the third and fourth quarters of 1989.

However, this new data to be released is from last July through September. It is old news. We saw increases in cocaine and heroin use in the 1991 Household Survey data released in January.

The increase in DAWN shows that we are fighting a two-front war. Against casual use and use by adolescents we are continuing to make significant progress. Adolescent drug use is at its lowest level since 1975.

Against hard-core use progress is more difficult. The data show that the increases in DAWN occurred among older users. More than half of the increase occurred in central cities, especially among Hispanics and whites. Previously, the major increases had been among blacks.

The Administration anticipated the problem with hard-core use in the first National Drug Control Strategy and has for two years proposed specific targeted programmatic initiatives to target hard-core and at-risk populations with expanded treatment and prevention programs. Congress has cut the Administration's request for these programs.
