I believe this exercise
would produce all night
negotiations and, very likely,
an unsatisfactory document.
Nevertheless, here it is.

ation and statistics - one effort
is Bureau - Statistical Office

As I mentioned this morning, we could help in the telecommunication area by short term (like installed in 90 days!) cellular phone system using analog technology until or whenever export controls and COCOM allowed digital - plus U.S. West, AT&T putting down fibre optic across the USSR when and if appropriate national security concerns can be covered (and some very smart people think we can make sure that the concerns can be satisfied). This is more medium term, but we shouldn't let some other Western country and company capture this.

When we leave tonight for Poland besides reporting back to you and getting our business friends involved, we'll be talking and talking about a draft outline of a comprehensive business and economic agreement - not only is this very important because it will give comfort and assistance to U.S. companies going or contemplating going into Poland, but it will also serve as a paradigm for other Eastern European countries. Perhaps it could work with some ramifications for an agreement between USSR and U.S.

Good luck in Malta.

Best,

Bob

P.S. Wonderful TV press show in the Oval Office this afternoon.
