## LEGEND

### MOON RISE/SET

MINOR FEEDING PERIODS (+/- 1 HR)

### MOON OVER/ MOON UNDER

MAJOR FEEDING PERIODS, +/- 2 HRS

★STARS INDICATE BETTER★  
THAN AVERAGE POTENTIAL

**Minor Feeding Periods** coincide with the moon on the horizon, and last from 1.0 to 1.5 hrs after the moon rise or before moon set.  
**Major Feeding Periods** are about 1.0 to 1.5 hrs either side of the moon directly overhead or underfoot.  
**Many variables encourage active feeding** current flow (whether wind or tidal driven), changes in water temp & weather, moon phases, etc. Combine as many as possible for a better chance at an exceptional day. Find concentrations of bait set up during a good time frame, and enjoy the results.

Please note that the tides listed in this table are for the Galveston Channel. The Tidal Corrections can be applied to the areas affected by the Galveston tide.

For other locations, i.e. Port O'Connor, Port Aransas, Corpus Christi and Port Isabel please refer to the charts displayed below.

### Tidal Corrections

| Location                   | High   | Low   |
