American Welding Society®
EAST TEXAS SECTION

AWS SECTION MEETING

Hosted by Fronius USA

DATE: Thursday, August 20, 2026

TIME: 6:30 PM – 8:30 PM

LOCATION: LeTourneau University
Kielhorn Welding Lab
620 Harris Dr
Longview, TX 75602

FEATURED PRESENTATION

WIRE ADDITIVE MANUFACTURING WITH THE FRONIUS CWC-M

Discover the future of manufacturing with live wire additive technology. See firsthand how Fronius is advancing efficiency, precision, and flexibility with the CWC-M.

Cobot welding cell

CWC- mobile

The Fronius CWC-mobile provides for portability in cobot welding. Its compact design, including the transport unit with casters and retractable feet, makes it easy to move the welding cell between different large components. CWC-mobile fulfills statutory safety requirements, is CE-certified, and has a portable glare shield (EN ISO 25980) in the form of safety curtains. Not only that, the welding table makes it simple to weld small series.
